

**AMENDMENT TO THE SPECIFICATION:**

*Please amend paragraph [0072] on page 3 as follows:*

[0072] The source of light bulb 4, is set in the focus of a parabolic mirror 6 made of a material with a high absorption coefficient for some frequency categories. Further, the bulb is positioned directly in front of the light source bulb, as is shown in Figure 1. Whereas “directly in front of” means that nothing obstructs the path of light from the light source to the parabolic mirror.
